

BLUWELD S 250

MMA

DC 1
Phase

Inverter technology is covered electrode welding machines.

- Hotstart and Arc Force settings.
- It is able to weld continuously with rutile and basic character electrodes.
- The Lift TIG feature makes it possible to make a TIG source without the need for High Frequency (HF).
- Digital ampermeter indicator.
- Compatible with generators.

Applications:

MMA
Lift TIG

Input Voltage	Frequency	Power	Power Factor	Current Range	Rated Output Current	Voltage and Duty Cycle (40°C)	Dimensions (YxGxD)	Weight	Protection Class
